Notes: (1) Contributing Cultural Property Numbers CCP 006 and CCP 042 are not used.
(2) The Hopi tribe did not participate in the compilation of information presented in this table.

Key: (a) The Pueblo of Acoma initially instructed Dr. Kurt F. Anschuetz to compile information about CCP using information previously compiled through a formal program of community consultations undertaken for the Indian Claims Commission proceedings. Dr. Anschuetz then talked with knowledgeable community members to address questions raised during his literature review. These focused consultations led to the identification of other CCP. No on-site consultations took place.
(b) The Pueblo of Laguna asked Dr. T. J. Ferguson to consult with knowledgeable elders directly in a series of formal ethnographic interviews. This work included consultation meetings both at the Pueblo and on the Mountain during a series of site visits.
(c) The Pueblo of Zuni asked Mr. Kurt E. Dongoski to consult with knowledgeable elders directly in a series of formal ethnographic interviews. This work included consultation meetings both at the Pueblo and on the Mountain during a series of site visits.
(d) Mr. Kelly Francis and other staff of Navajo Nation Historic Preservation Department (NNHPD) used the ethnographic study completed by Dr. Klara B. Kelley and Mr. Harris Francis for the Nation's contribution to the Tribes' significance statement to identify CCP. Mr. Francis also relied on ethnographic resource materials maintained in the NNHPD files for additional information about the locations of specific CCP mentioned in Dr. Kelly and Mr. Francis' report.
